What is Aerospace Forum Birmingham?

AF Birmingham is a supply chain event that brings together engine makers and first-tier systems makers with the entire supply chain. Engineering, procurement, supply chain, manufacturing, commodity teams, suppliers and service providers will meet through pre-arranged one-on-one meetings.

On Day one **AF Birmingham** will feature a major international conference coordinated by **Midlands Aerospace Alliance**. Prominent speakers will address aerospace business growth opportunities, future technology directions, how supply chain companies can improve their performance – and, inevitably, the implications of Brexit.

“The Midlands is an important base for Meggitt plc, hosting key sites for our Aircraft Braking Systems, Control Systems and Polymers & Composites divisions. I am pleased to offer our support to Aerospace Forum Birmingham 2021 as an important opportunity to bring OEMs, Tier 1s and the aerospace supply chain together for mutual benefit.”

Tony Wood,
Chief Executive
Meggitt plc.

MEGGITT

“After the success of the first Aero Engine Forum in 2017 Moog are delighted to have the opportunity to return to support this valuable event, which helps us meet with existing and potential new suppliers for our aerospace programmes.”

Stuart McLachlan,
Aerospace Control Components Sector VP
Moog Aircraft Group

MOOG

“Rolls-Royce is committed to boosting supply chain capability in aerospace and to developing new and existing relationships, so we are delighted to support the Aerospace Forum 2021. At Rolls-Royce we are continuously exploring ways to improve communication and collaboration across the supply chain in order to develop relationships that encourage innovation, competitiveness and operational excellence. This forum is a great opportunity to meet potential new suppliers and to network with like-minded colleagues in the aerospace industry.”

Gordon Tytler,
Director of Procurement
Rolls-Royce

Rolls-Royce

“The world's aerospace industry is currently expanding rapidly. Airbus and Boeing aircraft production rates continue to grow to levels that were previously unheard of, with the number of aircraft manufactured forecast to triple between 2005 and 2025. The aerospace supply chain in the Midlands has an important role to play in making these projections a reality. But we all need to work together even more closely if our companies are to benefit from this growth by providing the capacity and delivering on-time what our customers require. That's why I welcome this second edition of Aerospace Forum Birmingham as an opportunity for us to meet together, discuss new business, and improve our performance for the future.”

Robert Hupfer,
Actuation Systems General Manager
Wolverhampton

Who can attend?

You want to meet suppliers and manufacturing partners!

You are involved in :

- ✓ Supply chain
- ✓ Procurement
- ✓ Purchasing
- ✓ Engineering
- ✓ Fabrication
- ✓ R&D, etc...

You want to sell your capabilities, products or services!

You are involved in :

- ✓ Sales
- ✓ Marketing
- ✓ Business development
- ✓ Technical promotion, etc...

What is Aerospace Forum Birmingham's technical spectrum?

•➤ SYSTEMS:

- Fans
- Compressors
- Transmission structures
- Combustion chambers
- Fuel and injection systems
- Rotative systems
- Installation and control: nacelles, thrust reversers

•➤ TYPE OF ENGINE:

- Jet engine
- Gas turbine
- Steam turbine
- Diesel engine
- Gasoline engine

•➤ GENERAL AVIATION:

- Aerostructure
- Avionics

Event format and program

April 27, 2021

The Midlands Aerospace Alliance Global Conference

Day One of AEF Birmingham is a major international conference bringing together the engine makers and first-tier systems makers with the supply chain to exchange critical information. Expect an impressive line-up of speakers from prominent industry players setting out business growth opportunities, future technology trends and the performance they need from their suppliers today and tomorrow.

April 28 & 29, 2021

One-to-one meetings

The program will offer all participants the opportunity to sign up, identify and request meetings with relevant contacts prior to the show. Schedules of meetings, based on those choices, will be pre-arranged. The one-to-one meetings will be held at the venue.

Workshops

These presentations focus on either technologies or products. This is a chance for a limited number of suppliers to reach an audience of professionals willing to increase and optimize their market knowledge. These activities will be held in parallel to the meetings.

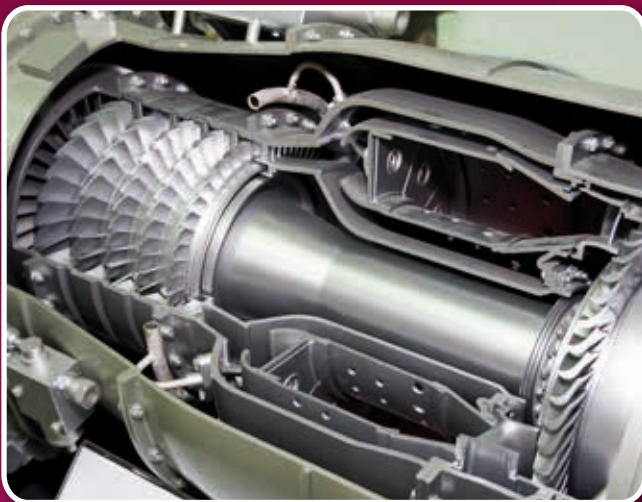

The Midlands: At the Heart of UK Aerospace

“It is my pleasure to welcome the international aerospace industry to Birmingham, UK. The Midlands aerospace sector has grown up alongside our automotive industry over the last 100 years to become one of the world’s premier aerospace clusters. We may not make aircraft but we do make superb aircraft engines and a wide range of innovative hydro-mechanical, electrical and electronic systems. We are proud our engineering and manufacturing capabilities that generate more than 45,000 jobs at more than 300 large and small companies. I am honoured to join Rolls-Royce, UTC Aerospace Systems, Moog Aircraft Group, BCI Aerospace and all of our aerospace suppliers in hosting this outstanding event in the Midlands.

We look forward to seeing you in Telford in April 2021.”

*Dr Andrew Mair, Chief Executive
Midlands Aerospace Alliance*

By the organizers of Aeromart Toulouse, the Aerospace & Defense Supplier Summit Seattle, Engine Forum Sonora, Aerospace & Defense Meetings Torino and Aerospace & Defense Meetings Sevilla.
